Probation Department

Probation's main goals are to assist the child in being successful, reducing recidivism, and to protect the child and community.

Probation Supervision involves assisting the family and youth in finding relevant resources to aid them in being successful. Probation is here to strengthen the family's ability to provide support, direction and positive role modeling for the youth.

Probation's focus is on assisting the child building and enhancing supportive relationships with positive adults and peers. These relationships provide support and encouragement to assist the youth in becoming a productive member of the community. These relationships give the minor support and guidance which assist them in meeting their basic human needs.

Probation hopes to enhance a youth's capabilities, skills, and interests to allow them to face life's challenges. Therapeutic interventions focus on the multi dimensions of a youth's life and enhance the youth and their family's problem solving skills.

Probation conducts an assessment to decide which programs and therapeutic services are relevant for the child. The youth and their family's involvement are paramount.
